would also have replaced the existing Nurse Licensure Compact with an enhanced version. The bill

Sponsors: Rep. Daneya Esgar (D), Sen. Dominick Moreno (D)

Status: Failed in Senate State, Veterans and Military Affairs Committee (3-2)

Sponsors: Rep. Lois Landgraf (R), Sen. Larry Crowder (R)

<u>Sponsors</u>: Reps. Alex Garnett (D) and Lori Saine (R), Sens. Lucia Guzman (D) and Jack Tate (R) <u>Status</u>: Governor Signed

 Requires a majority of condo owners to vote on taking legal action against developers for construction defects, rather than a vote by the homeowners' association only. Homeowners' associations must hold a meeting where the developer can make an offer to remedy the defect(s). The bill addressed a hot topic for affordable housing advocates who link housing availability to health and was one of the session's biggest bipartisan success stories. After years of failure on the issue, HB 1279 passed the House unanimously and picked up all but two votes in the Senate.

Sponsors: Sen. Jack Tate (R), Rep. Cole Wist (R)

Status: Failed in House State, Veterans and Military Affairs Committee (5-3)

• Would have allowed Medicaid recipients to pay and receive care from non-Medicaid providers. Prior to providing medical services, a non-enrolled provider would have needed to sign an agreement with the Medicaid enrollee, and could then have charged them for the cost of the services. Enrollees are not currently prohibited from seeing non-Medicaid providers but do not have access to them because the providers are not paid. Opponents worried this would incentivize providers to drop out of the Medicaid program.

Sponsors: Sen. John Kefalas (D), Rep. Susan Lontine (D)

Status: Failed in Senate State, Veterans and Military Affairs Committee (3-2)

• Would have regulated freestanding emergency departments (FSEDs) – those not attached to a hospital. FSEDs, which are being built with increasing frequency (especially in Front Range suburbs), would have needed a new license and been subject to rules regarding safety and care standards, staffing requirements, improved transparency in billing and other requirements. In addition, Colorado would not have licensed any new FSEDs until July 2019, unless the facility was in an underserved (i.e., rural) area.

standards with the providers in its networks, and make the standards available in plain language to
the public.
