

## Methodology Documentation

This methodology document corresponds to the Colorado Health Institute (CHI) report “A Story in the Data: Disaggregating Colorado’s Data Systems to Understand Behavioral Health within the Hispanic or Latino Community.” In this report, CHI analyzed four behavioral health conditions, including depression, anxiety, bipolar disorder, and substance use disorder.

Diagnoses codes for the four behavioral health conditions followed parameters outlined by the Colorado Health Observation Regional Database Service. The [International Statistical Classification of Diseases and Related Health Problems \(ICD\)-10](#) and ICD-9 diagnosis codes included in each behavioral health condition are listed in the following sections.
