Sharing is Caring

Creating a Health Information System that Works

Allie Morgan

December 5, 2014

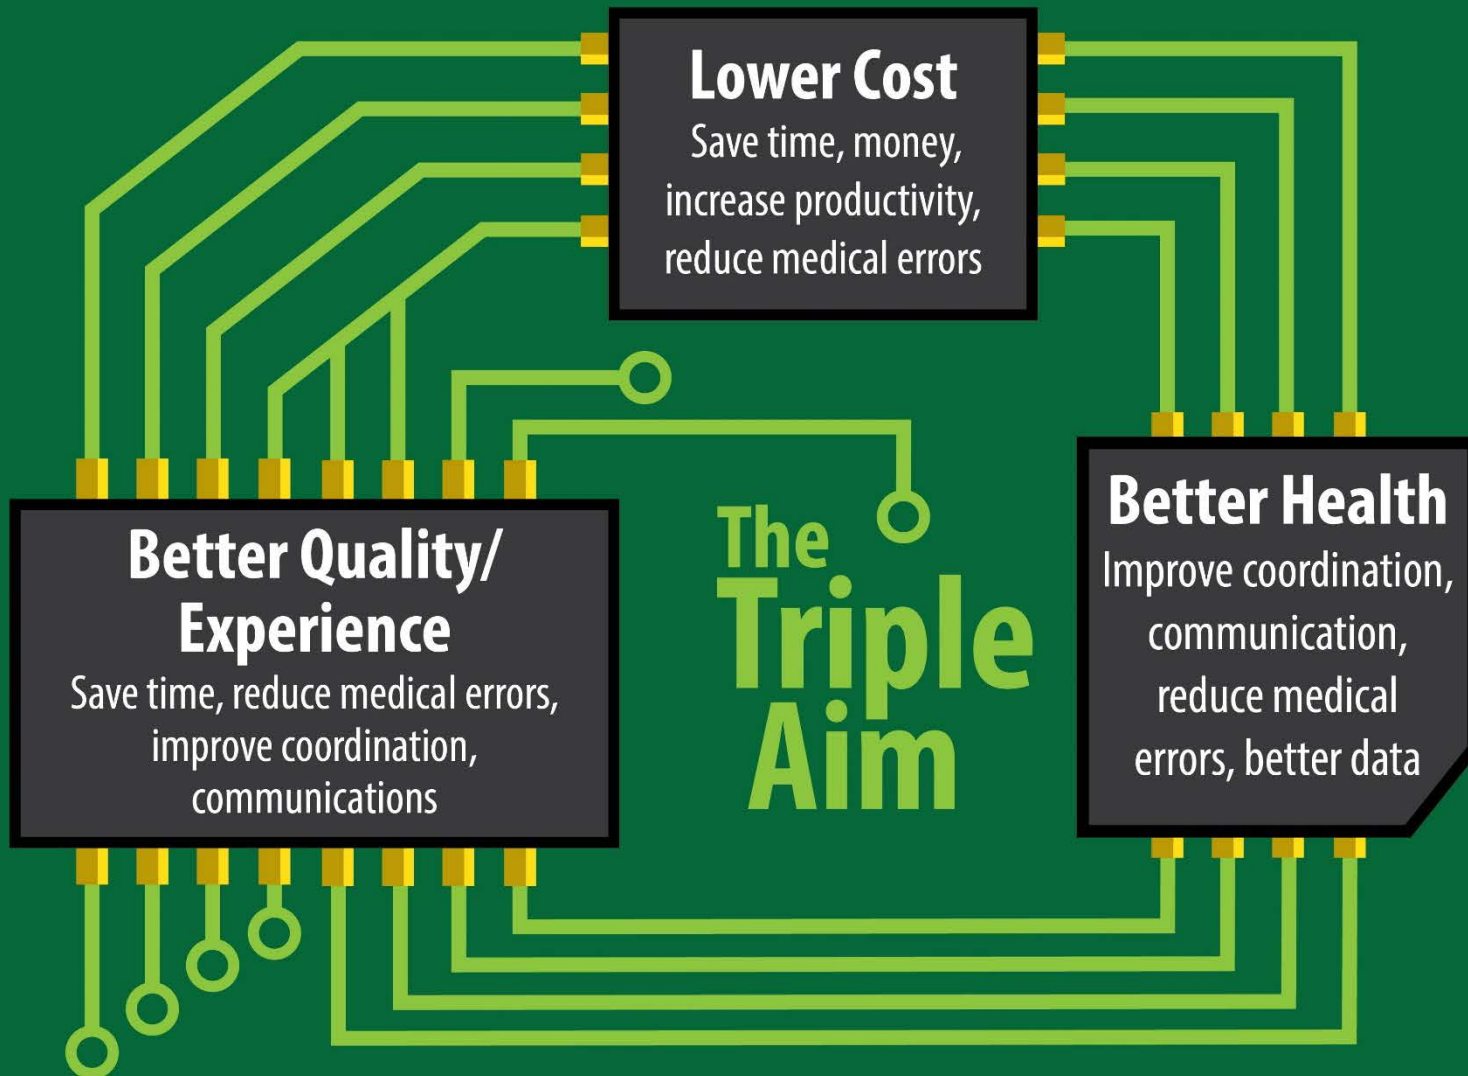

Three Takeaways

- EHRs hold potential to move us toward the Triple Aim.
- Electronic information sharing is key to advancing EHR use.
- EHR Adoption = Success
Information Sharing = Challenge

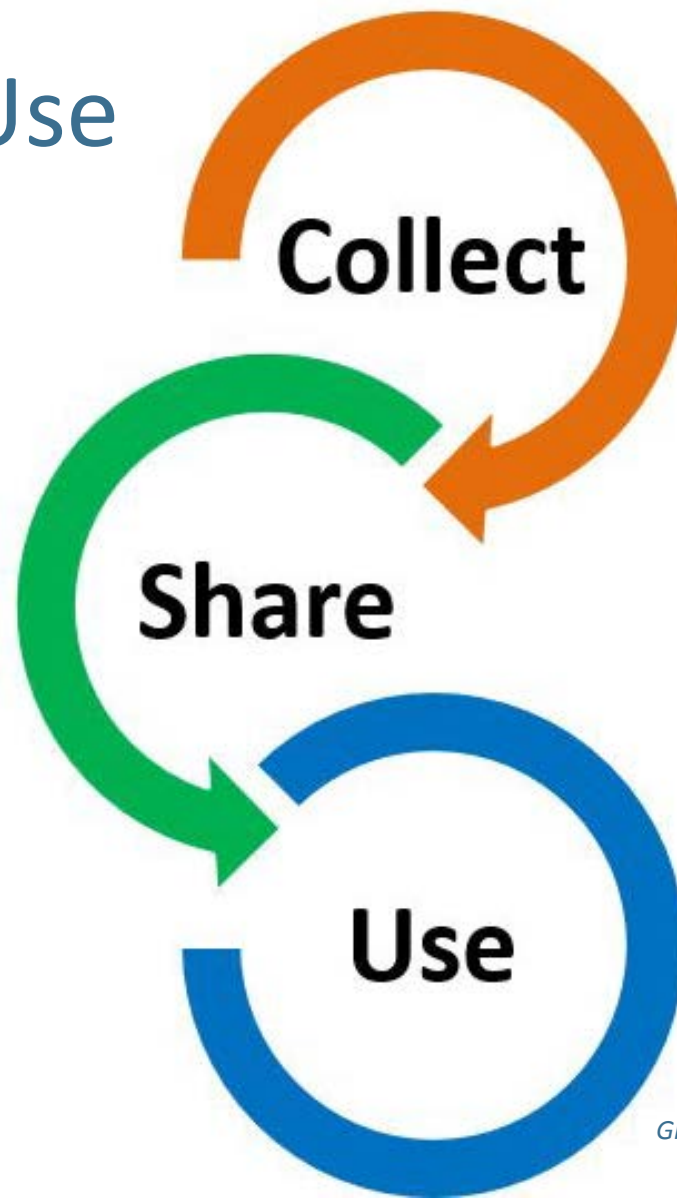

The Hope for HIT

National Incentive Program

Meaningful Use

Graphic: ONC

Stage 1 → Stage 2 → Stage 3

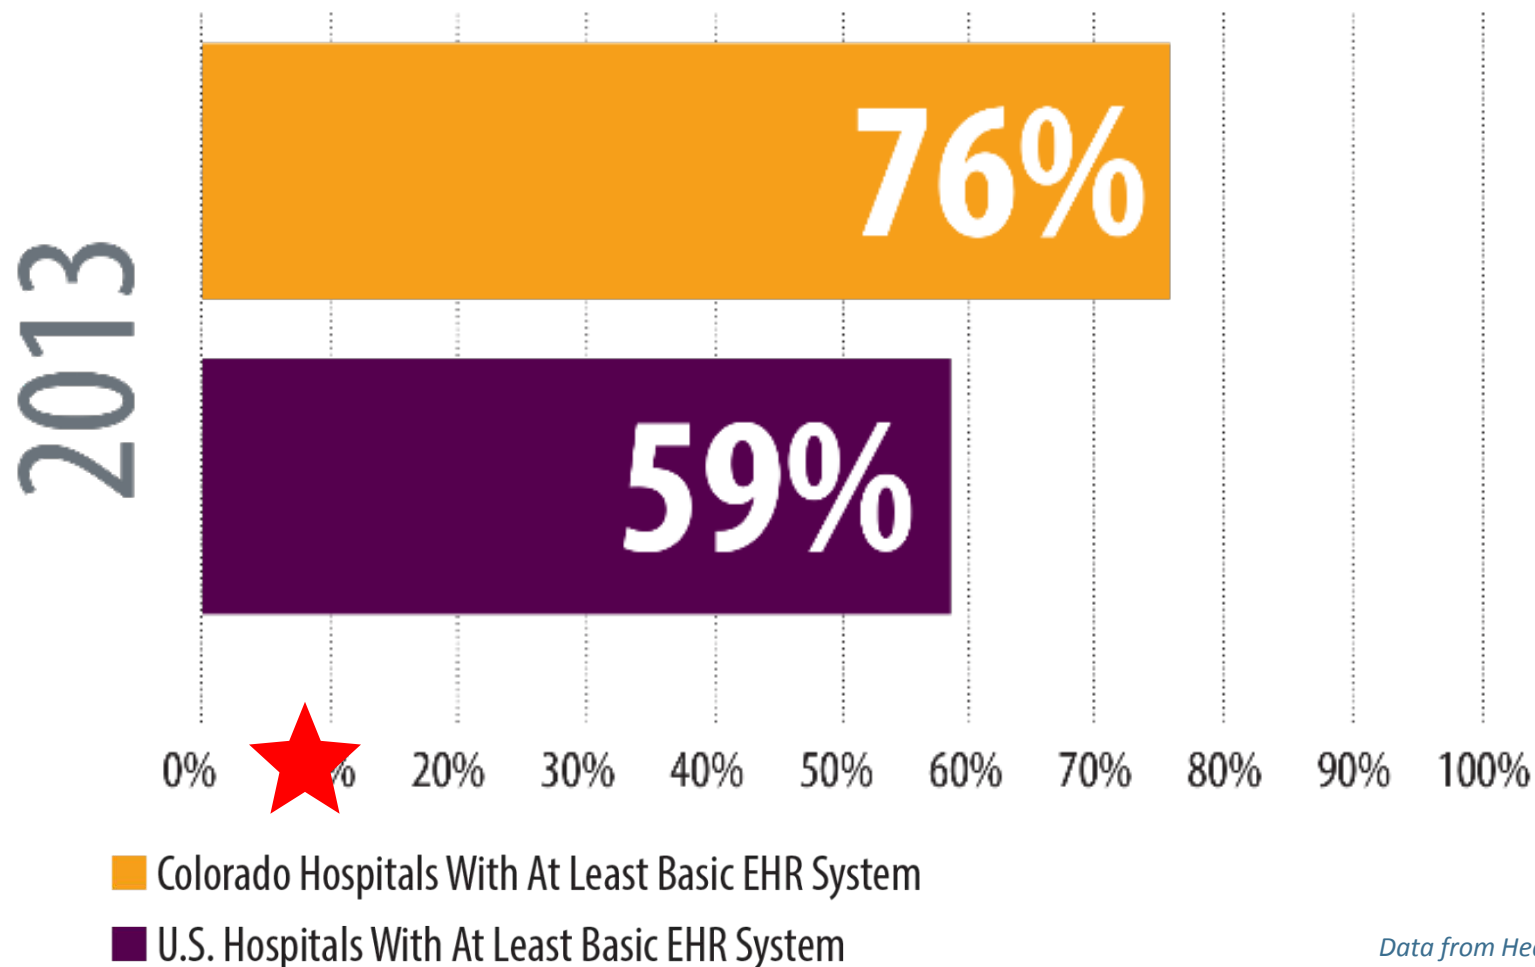

The Big Question:

*What have we
received in return for
our money and time?*

EHR Adoption: Hospitals

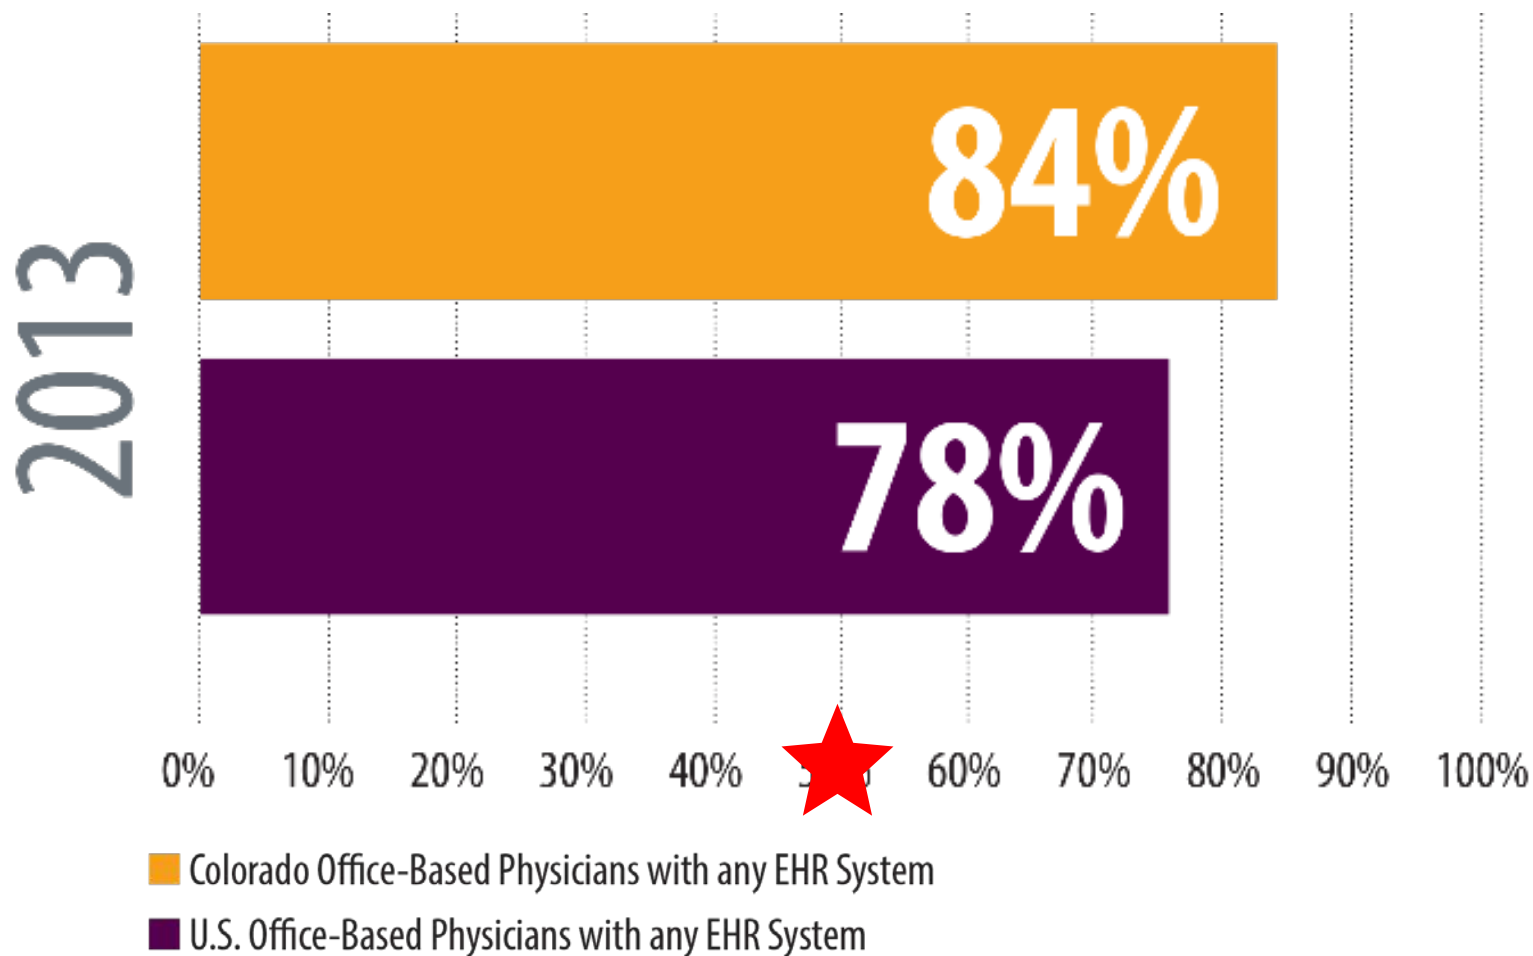

Colorado Versus U.S.: Hospital Adoption of EHR Systems

Data from HealthIT.gov

EHR Adoption: Physicians

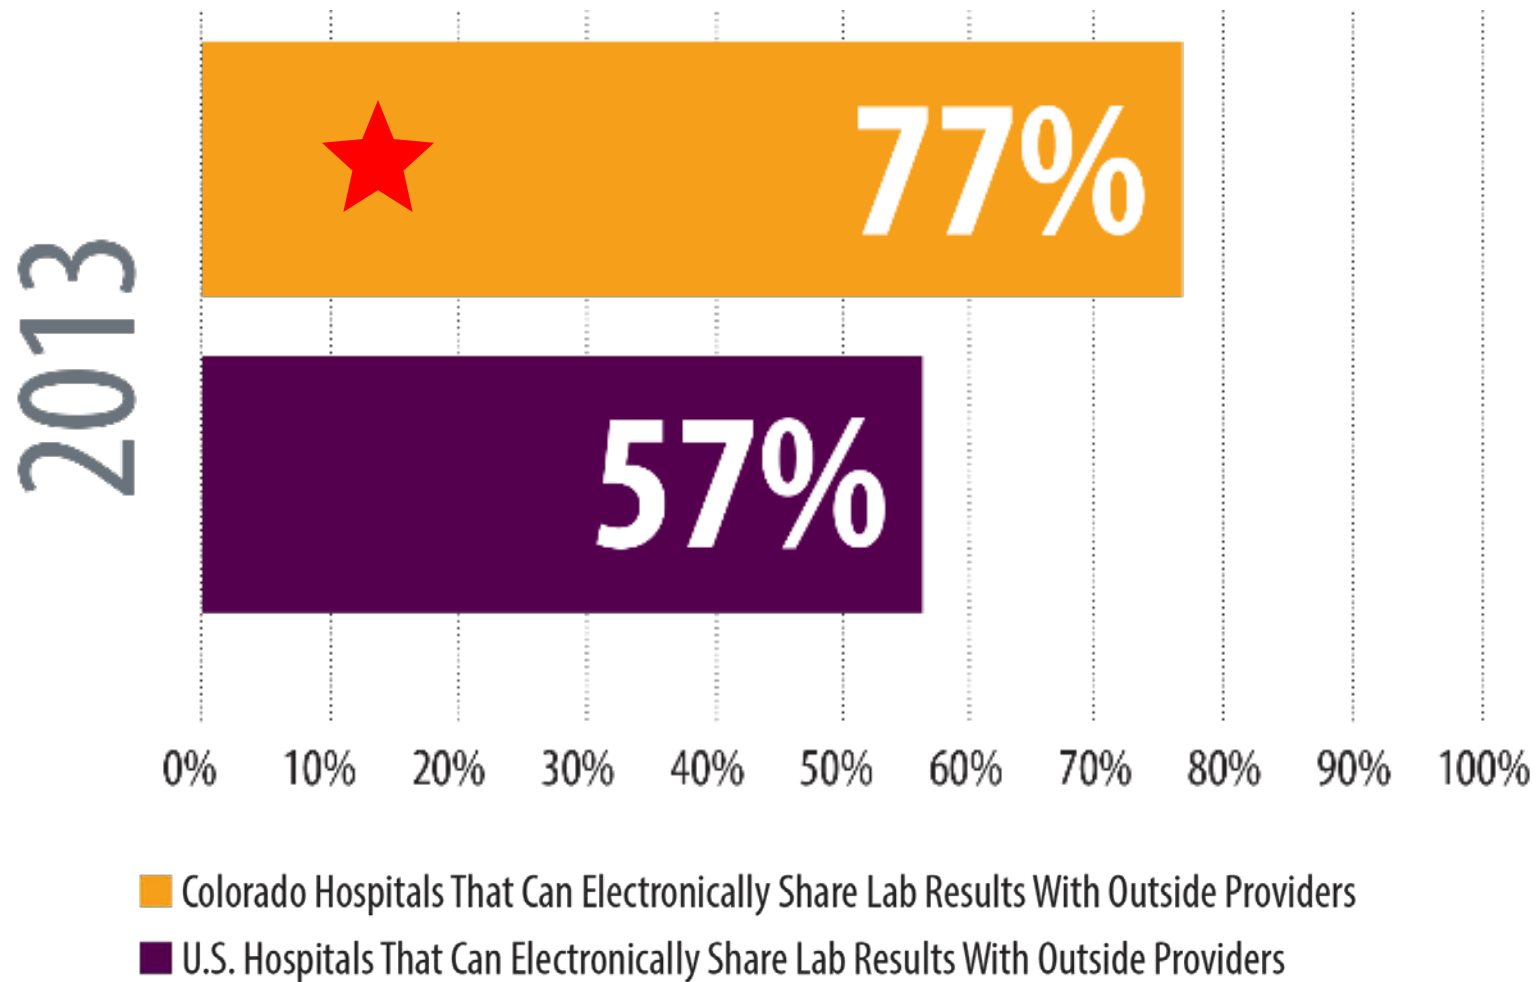

Colorado Versus U.S.: Physician Adoption of EHR Systems

Data from HealthIT.gov and the CDC/NCHS

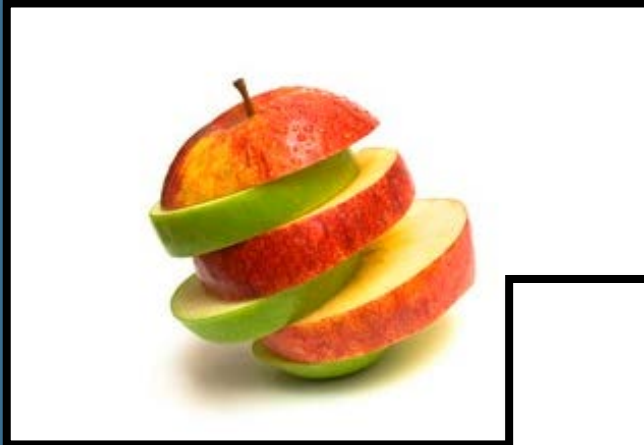

Health Information Exchange (HIE)

Colorado Versus U.S.: Hospital Electronic Sharing of Lab Results

Data from HealthIT.gov and Health Affairs

Critical Success Factors

Improved Interoperability

A Better Business Case for Providers

Evidence of Patient Engagement and Improved Experience

Three Takeaways

- EHRs hold potential to move us toward the Triple Aim.
- Electronic information sharing is key to advancing EHR use.
- EHR Adoption = Success
Information Sharing = Challenge
